

International Symposium On the Properties Of Water

ISOPOW 14

August 24-28, 2019

AgroSup Dijon – France

Save the date
in your agenda

For its 14th edition, ISOPOW will be back in Burgundy as Beaune already hosted the 3rd edition in 1983. It will still mainly focus on the role of water for material properties in the fields of foods, pharmaceuticals and biological systems. **For future and for everyone, the health and gastronomy in our plates remains a key question for ISOPOW members.** The aims of the symposium is to remain an important platform for discussions between academic and industrial scientists/technologists in charge of the physico-chemical properties and stability of their new products.

Symposium Topics

- Water in solid food and pharmaceutical materials
- Water and structuration of soft food and pharmaceutical materials
- Water and de-structuration of biomaterials
- Water and biological systems : to kill or to keep alive
- Water transport and barriers : the path to a controlled release
- Water-scopy : new techniques and modeling to probe water in foods and pharmaceuticals

Conference Venue

The symposium will take place

at **AgroSup Dijon**, a well-known institute for the education of food experts, where you will meet your future collaborator...

in **Dijon**, which is one of the four cities in France recognized as representative city for the typical “Gastronomic meal of the French” inscribed in 2010 on the List of the Intangible Cultural Heritage of Humanity of UNESCO, and 4th ranked city where living is the best in France.

In **Burgundy**, where you will find wonderful beverages and unforgettable landscapes.
